INSTALLING LIGHT KIT

1. Locate two single wires in the switch housing (white and blue labeled "for light")
2. Connect them to the light kit wires . Make sure they fasten together tightly (Fig.1).
   * White to white
   * Blue to Black

   Secure all splices with electrical tape to prevent connectors from vibrating loose during fan operation.
3. Carefully push all wires back into the switch housing. Then attach switch housing cover plate to switch housing with the 3 screws provided.
4. Install two(40 watt max.) light bulbs (not provided).
5. Install the glass back onto light kit
6. Restore power and your light kit is ready for operation.
7. If the light kit does not work , turn off the electricity and lower either the canopy or decorative housing on your ceiling fan. Make sure the blue wire is connected to black household wire. (Please refer to the electrical connections section in this manual)
